## EDUCATION

**University of California, Berkeley**  
**Bachelor's in Architecture, Honors**  
2017

**Team Treehouse Techdegree**  
**Front End Web Development**

Online training program preparing students to be successful engineers.

2019

**Springboard**  
**Software Engineering Bootcamp**

Coding bootcamp with over 800 hours of hands-on curriculum, mastering full-stack technologies.

2020

## SKILLS

### DESIGN

Figma  
Photoshop  
Illustrator  
After Effects

### FRONT END

HTML  
CSS | SASS  
Javascript | jQuery  
React | Redux

### DATA

SQL  
PostgreSQL  
MongoDB  
Firebase

### SERVER

Python | Flask  
NodeJS  
Express

# KEVIN REBER

## FULL-STACK SOFTWARE ENGINEER

[kevinreber@berkeley.edu](mailto:kevinreber@berkeley.edu) | (650) 745-6227 | [www.kevinreber.dev](http://www.kevinreber.dev)

## ABOUT

Self-taught engineer with over 5 years of experience in the design world. Combining my design and engineering skills, I've been able to build full-stack web applications focused on the user's experience.

## EXPERIENCE

### Mate

**Full-Stack Software Engineer** June 2020 - Present

Mate is building an online platform to help students stay connected with classmates and college events.

- Integrate real-time data synchronization for Mobile and Web using Google Cloud's Firebase.
- Designed and developed RESTful API using NodeJs.
- Build out features from scratch using modern front end tools such as React Hooks and Redux.
- Lead UI/UX designer responsible for creating product wireframes and prototypes in Figma.

### Team Treehouse

**Code Reviewer** Aug 2019 - Jan 2020

- Review and provide feedback for students coding projects.
- Host office hours, sharing and discussing external resources to help improve students engineering skills.

### Andrew Mann Architecture

**Architectural Jr. Designer** 2017 - 2019

## PROJECTS

### Stock Footage Manager

[www.bit.ly/kevinreber-stock-footage-app](http://www.bit.ly/kevinreber-stock-footage-app)

Full-stack web application that helps users manage and sell their stock footage to various stock footage agencies.

Tech Stack: jQuery, Flask, Pandas, GoogleCloud's Vision API

### Dream Jobs

[www.bit.ly/kevinreber-code-dreamjobs](http://www.bit.ly/kevinreber-code-dreamjobs)

Job searching platform user's can use to manage and keep track of jobs they have applied to.

Tech Stack: NodeJS, React, Redux, PostgreSQL
